Hindi: Proficient

Dipendra Bhatta

Summary

Passionate backend developer with a strong focus on Spring Boot, complemented by robust frontend experience in React.js, and Next.js. Adept at designing and implementing scalable backend solutions while delivering responsive and dynamic user interfaces. Proven ability to manage full-stack development projects and integrate modern technologies to enhance application performance and user experience.

Projects

SajiloDev 🐙 🌐

SajiloDev is a web platform built with React.ts and Firebase for ordering technical services such as website creation, domain checks, hosting, and maintenance. It provides a user-friendly interface for managing these services.

Payment Management System 🐙

Payment Management System is a Next.js and TypeScript-based platform that connects multiple bank accounts, displays real-time transactions, and allows fund transfers. It integrates with Plaid for account linking and Dwolla for transfers, featuring secure authentication and responsive design.

Geoland Travels 🐙 🌐

Geoland Travels is a travel platform with admin and user panels, built with React.js and TypeScript, and powered by Firebase for the backend. It offers inbound and outbound tours, ticketing services, and pricing details.

Whatsapp-clone 🐙

WhatsApp Clone is a web-based chat application that replicates WhatsApp's functionality, featuring real-time chat, user authentication, and group messaging. Built with React on the frontend and Spring Boot on the backend, it supports text messaging, attachments, and user profile management.

Experience

Google DSC, FET JU- Backend Developer

Bengaluru, India

07/2023 - 07/2024

-Faciliated backend developmet workshop and sessions, guiding students in understanding core backend concepts and technologies

SajiloDev - Full stack Web Developer

Kathmandu, Nepal

11/2023 - 06/2024

-Developed and deployed multiple production ready projects, including websites for Geoland Tour and Travels, gharsanchar.com, sajilodev's official site and a university in Nepal
